
Resume

JÉRÔME DRONIOU

20/01/2019

Curriculum Vitae

Given names: **Jérôme, Daniel, Raymond**

Last name: **Droniou**

Date and place of birth: 26/08/1975, Toulouse (France)

Family status: Married, 1 child

Citizenship: French, Australian

Languages: French (mother tongue), English (fluent)

Address: School of Mathematical Sciences, Monash University, Clayton, Victoria 3800, AUSTRALIA.

E-mail: jerome.droniou@monash.edu

Webpage: <http://users.monash.edu.au/~jdroniou/>

Positions:

- 2018-...: Associate Professor at Monash University.
- 2012-2017: Senior Lecturer at Monash University.
- 2006-2011: “Professeur des Universités” at the University Montpellier 2.

Diplomas, titles and awards:

- 2004: “Habilitation à Diriger des Recherches”¹.
Defended the 26/11/2004 at the University Montpellier 2. Title: “Theoretical and numerical study of elliptic, parabolic and non-local partial differential equations”.
- 2001: PhD thesis.
Defended the 18/06/2001 at University Aix-Marseille I. Title: “Study of some Partial Differential Equations”.

Publications

Research interests:

- Numerical schemes for diffusion equations
I study discretization techniques for diffusion and convection-diffusion equations, possibly coupled and nonlinear, that appear in particular in models of flows in porous media. I am interested in both the design and the theoretical study of numerical methods that give accurate results in real-world situations encountered in oil recovery or underground carbon sequestration. Some of the challenges faced by such methods are irregular data, strong heterogeneity and anisotropy of the media, generic (unstructured) meshes, etc.
- Scalar conservation laws
I mostly consider conservation laws (such as the Burgers equation) with an added fractionnal power of the Laplace operator. Such equations are non-local and appear in particular in models of detonations in gases. I study mathematical properties of the model (well-posedness, qualitative properties of the solution, etc.) as well as its numerical approximation.

¹ “Habilitation à Diriger des Recherches”, which translates as “Authorisation to Supervise Research”, is the highest diploma in France and is required to become “Professeur des Universités” in a French university.

- Elliptic and parabolic equations

I am interested in linear and non-linear elliptic and parabolic problems, in cases where the underlying operator is non-coercive (because of the presence of a convective term) and/or some data are singular (such as in simplified models of reservoirs with wells). I also worked on the Allen-Cahn equation and its convergence to generalised motion by mean curvature, as well as some stability result for doubly degenerate parabolic equations.

Book

- [1] *The gradient discretisation method.* Jérôme Droniou, Robert Eymard, Thierry Gallouët, Cindy Guichard, and Raphaële Herbin. Mathematics & Applications, vol. 82. Springer, **2018**, 511p. DOI: 10.1007/978-3-319-79042-8. URL: <https://hal.archives-ouvertes.fr/hal-01382358>.

Articles in international peer-reviewed journals:

To appear:

- [2] A unified analysis of elliptic problems with various boundary conditions and their approximation. Jérôme Droniou, Robert Eymard, Thierry Gallouët, and Raphaële Herbin. *Czechoslovak Mathematical Journal*, 22p, **2018**. URL: <https://arxiv.org/abs/1806.10482>.
- [3] Unified convergence analysis of numerical schemes for a miscible displacement problem. Jérôme Droniou, Robert Eymard, Alain Prignet, and Kyle S. Talbot. *Found. Comput. Math.* To appear, 42p, **2018**. DOI: 10.1007/s10208-018-9387-y. URL: <https://arxiv.org/abs/1707.06034>.
- [4] Numerical analysis of a two-phase flow discrete fracture model. Jérôme Droniou, Julian Hennicker, and Roland Masson. *Numer. Math.* 42p, **2018**. DOI: 10.1007/s00211-018-0994-y. URL: <https://arxiv.org/abs/1612.07373>.

- [77] Contrôle de l'architecture et des représentations internes dans les réseaux de neurones multicouches, Jérôme Droniou, André Elisseeff, Hélène Paugam-Moisy, and Olivier Teytaud. Actes de la Conférence sur l'Apprentissage CAP'99 (Palaiseau, 1999). **1999**, pp. 185–194.

Submitted articles

- [1] High-order mass-lumped schemes for nonlinear degenerate elliptic equations. Jérôme Droniou and Robert Eymard, 28p, **2019**. URL: <https://arxiv.org/abs/1902.04662>.
- [2] A combined GDM–ELLAM–MMOC scheme for advection dominated PDEs. Hanz Martin Cheng, Jérôme Droniou, and Kim-Ngan Le, 35p, **2018**. URL: <https://arxiv.org/abs/1805.05585>.
- [3] Limits of the Stokes and Navier–Stokes equations in a punctured periodic domain. Michel Chipot, Jérôme Droniou, Gabriela Planas, and James C. Robinson, 25p, **2017**. URL: <https://arxiv.org/abs/1407.6942>.

Textbook:

- MATHÉMATIQUES ET STATISTIQUE POUR LES SCIENCES DE LA NATURE (modéliser, comprendre et appliquer) (Mathematics and statistics for the natural sciences (modelling, understanding and applying)), G. Biau, J. Droniou et M. Herzlich, Collection Enseignement Sup / Mathématiques, EDP Sciences, mars 2010, 530p, ISBN 978-2-7598-0481-8.
This book is based on our experience of teaching mathematics to undergraduate students enrolled mainly in Biology, Chemistry and Earth Sciences studies.

Booklets:

- *A beginner's course in finite volume approximation of scalar conservation laws* (39p), J. Droniou, Pau – Toulouse – Zaragoza – summer school on nonlinear conservation laws, Jaca (Spain) 11-13/09/2008. http://users.monash.edu/~jdroniou/jaca_summer_school/.

- *Degrés topologiques et applications* (Topological degrees and applications) (56 p.), J. Droniou, 2006. <http://users.monash.edu.au/~jdroniou/docs/degre.pdf>.
- *Quelques Résultats sur les Espaces de Sobolev* (Some results on Sobolev spaces) (85 p.), J. Droniou, Polycopiés de l'Ecole Doctorale de Maths-Info de Marseille, 2001. <https://hal.archives-ouvertes.fr/hal-01382370>.
- *Intégration et Espaces de Sobolev à Valeurs Vectorielles* (Vector-valued integration and Sobolev spaces) (71 p.), J. Droniou, Polycopiés de l'Ecole Doctorale de Maths-Info de Marseille, 2001. <https://hal.archives-ouvertes.fr/hal-01382368>.

Grants

- 2019–2021: Co-Lead Chief Investigator, together with Prof. R. Masson (INRIA Nice Sophia-Antipolis), of the INRIA Associate Team project “Mathematical and numerical methods for thermo-hydro-mechanical models in porous media with discontinuities”.
Aim: design and rigorously analyse numerical methods for hybrid-dimensional matrix fracture models, motivated by applications to geothermal systems (thermo-hydro models and hydro-mechanical models).
- 2018–2021: Chief Investigator for the ARC Linkage Project “Enabling three dimensional stochastic geological modelling” (LP170100985, Lead Chief Investigator: Dr Laurent Ailleres).
Aim: develop technologies to mitigate three dimensional (3D) geological risk in resources management, using mathematical methods, structural geology concepts and probabilistic programming.
- 2017–2019: Lead Chief Investigator for the ARC Discovery Project “Discrete functional analysis: bridging pure and numerical mathematics” (DP170100605).
Aim: develop numerical analysis tools for fully nonlinear real-world models of elliptic and parabolic PDEs.
- 2011–2014: Chief Investigator for the ANR research grant “IDEE” (ANR-2010-0112-01, Lead Chief Investigator: Matthieu Alfaro).
Aim: study interface dynamics in reaction-diffusion partial differential equations. [My participation to this project ended mid-2011 when I moved to Australia.]
- 2009–2012: Lead Chief Investigator for the ANR² research grant “VFSitCom” (ANR-08-BLAN-0275-01).
Aim: study numerical methods for flows in porous media, with targeted applications in oil recovery, carbon storage and the study of nuclear waste disposal hazards. [My participation to this project ended mid-2011 when I moved to Australia.]
- 2008–2010: Member of the GnR MoMaS (CNRS³)
The GnR MoMaS was a research group, funded by several French agencies, around mathematical modelling and numerical simulation for nuclear waste management problems.

Selected invitations (since 2008)

- 24–28/07/2017: keynote speaker at the “Equadiff 14” conference, Bratislava (Slovakia). *The beauty and efficiency of the gradient discretisation method.*
- 22–26/05/2017: keynote speaker at the “10th International Conference on Elliptic and Parabolic Problems”, Gaeta (Italy). *Uniform-in-time stability of doubly degenerate parabolic equations.*

²French equivalent of ARC.

³French equivalent of CSIRO.

- 15/09/2016–15/10/2016: invited for one month at the Institute Henri Poincaré (Paris), in the framework of a thematic quarter on Numerical PDEs.
- 1-3/12/2014: keynote speaker at the “Computational Techniques and Applications Conference (CTAC)” 2014, ANU (Canberra). *Mathematical tools for the numerical analysis of partial differential equations under real-world constraints*.
- 17-21/11/2014: keynote speaker at the “Scientific workshop of the GNR MoMaS”, CIRM Marseille (France). *A review of Finite Volume methods for anisotropic heterogeneous diffusion*.
- 19-23/03/2012: Invited to give a lecture to the Spring School “Analytical and Numerical Aspects of Evolution Equations”. Had to cancel due to my move to Australia and the uncertainty of my availability in March 2012.
- 6-10/06/2011: Invited keynote speaker to “FVCA6 – 6th International Symposium on Finite Volumes for Complex Applications”, Prague (Czech Republic). Had to cancel due to my move to Australia.
- 2-4/09/2009: Invited speaker at “New trends in Model Coupling (Theory, numerics and applications)”, Paris (France), *Discretizations of convection terms in hybrid mimetic mixed methods*.
- 26-27/01/2009: Invited speaker at the CEA-GAMNI workshop “Mécanique des fluides numérique”, Paris (France), *Some Finite Volume Methods to Handle Heterogeneous Anisotropic Diffusion*.
- 11-13/09/2008: keynote lecture at the “Pamplona–Pau–Toulouse–Zaragoza summer school on non-linear conservation laws”, Jaca (Spain), *A beginner’s course in finite volume approximation of scalar conservation laws*.
- 8-13/06/2008: keynote speaker at “FVCA5 – 5th International Symposium on Finite Volumes for Complex Applications”, Aussois (France), *A recipe to couple two finite volume schemes for elliptic problems*.

PhD supervisions

Completed PhD students

- JEAN-JEROME CASANOVA. *Self-regulation of flow in networks* (co-supervised with Jean-Pierre Raymond (University Toulouse III Paul Sabatier), funded by a scholarship of the French ministry of education; Sep 2015–Jul 2018).
- YAHYA ALNASHRI. *Numerical approximation of variational inequalities* (funded by the Saudi Arabia government; Jul 2013–Jul 2017).
- KYLE TALBOT. *Theoretical and numerical analysis of porous media flow models* (funded by a Monash PhD Scholarship with Faculty of Science top-up; Feb 2013–Apr 2017, with a 5-month Endeavour Fellowship in 2016).
 ◇ Kyle was awarded the 2017 Vice-Chancellor’s Commendation for Thesis Excellence in recognition of his outstanding doctoral thesis.
- MATHIEU CATHALA, from 09/2010 to 06/2011 (after my departure from France, F. Marche replaced me as supervisor). *Numerical analysis for flows in porous media* (funded by the French ministry of research; Sep 2010–Dec 2013).
- PIERRE ALIFRANGIS, co-supervised with M. Alfaro from 10/2009 to 06/2011 (after my departure from France, R. Carles replaced me as co-supervisor) *Partial differential equations and interface dynamics* (funded by the French ministry of research; Oct 2009–Jun 2013).

- THANH HAI ONG, co-supervised with C. Le Potier (CEA: French Nuclear Agency) from 11/2009 to 06/2011 (after my departure from France, R. Eymard replaced me as supervisor). *Cell-centered scheme for heterogeneous anisotropic diffusion problems on general meshes* (funded by the CEA; Nov 2009–Nov 2012).
- NATHAËL ALIBAUD, co-supervised with C. Imbert. *Study of some partial differential equations involving nonlocal terms* (funded by the French ministry of research; Sep 2003–Dec 2006).

Ongoing PhD students

- MOHAMMAD NAZMUL HOSSEIN. (co-supervised with M. Flegg (Monash); started January 2018).
- CHIRAPPURATHU REMESAN GOPIKRISHNAN. *Numerical methods for free boundary problems in three dimensions with applications in biology* (co-supervised with N. Nataraj (IITB) and Jennifer Flegg (University of Melbourne), funded by the IITB–Monash academy; started January 2017 [IITB=Indian Institute of Technology Bombay]).
- HANZ MARTIN CHENG. *Design and analysis of numerical methods for flows in porous media* (Funded by a Monash PhD scholarship; started March 2016).
- DEVIKA SHYLAJA. *Numerical methods for elliptic PDEs and optimal control problems* (co-supervised with N. Nataraj (IITB), funded by the IITB–Monash academy; started July 2015 [IITB=Indian Institute of Technology Bombay]).

Teaching

Monash University:

- 2019:
 - *Real Analysis* (2nd and 3rd year undergraduate): lectures (36h) and coordination.
 - *Differential Equations and Applications* (2nd year undergraduate): lectures (18h) and coordination.
- 2018:
 - *Real Analysis* (2nd and 3rd year undergraduate): lectures (36h), tutorials (22h) and coordination.
 - *Differential Equations and Applications* (2nd year undergraduate): lectures (18h) and coordination.
 - *Partial Differential Equations* (4th year – honours): lectures (18h).
- 2017:
 - *Real Analysis* (2nd and 3rd year undergraduate): lectures (36h), tutorials (22h) and coordination.
 - *Differential Equations and Applications* (2nd year undergraduate): lectures (18h) and coordination.
 - *Mathematics Research Project* (3rd year): coordination.
- 2016:
 - *Real Analysis* (2nd and 3rd year undergraduate): lectures (36h), tutorials (22h) and coordination.
 - *Differential Equations and Applications* (2nd year undergraduate): lectures (18h) and coordination.

- *Measure Theory* (4th year – honours): lectures (12h).
- *Mathematics Research Project* (3rd year): coordination.

AMSI:

- December 2012: *A beginner’s course in finite volume approximation of scalar conservation laws*, AGR short course (12h).
- January 2016: *Modern numerical methods for diffusion equations on generic grids*, AMSI Summer School, RMIT (Melbourne), 4-29 January 2016 (28h).

Scientific activities (◇ *items are ongoing*)

Editorial roles

- ◇ 2017–2018: Co-editor (with P. Antonietti and R. Eymard) of the special issue “Advanced numerical methods: recent developments, analysis, and applications” of *Computational Methods in Applied Mathematics (CMAM)*.
- ◇ 2014-...: Associate editor of *North-Western European Journal of Mathematics*⁴.
- ◇ 2013-...: Associate editor of *Mathematical Modelling and Numerical Analysis (M2AN)*.
- 2017: Co-editor (with M. Page and S. Clarke) of the proceedings of the 18th CTAC, published in the *ANZIAM electronic journal*. See <http://dx.doi.org/10.21914/anziamj.v58i0.11569>.

Conferences

- ◇ 2019 (29/04–03/05): Co-organisation (with P. Antonietti, L. Beirão da Veiga, D. Di Pietro and S. Krell) of the 3rd POEMS (Polytopal Element Methods in Mathematics and Engineering) workshop, CIRM (Marseille).
- 2017 (22/05–26/05): Co-organisation (with B. Andreianov and E. R. Jakobsen) of a mini-symposium *Stability for evolution problems* during the 10th International Conference on Elliptic and Parabolic Problems, Gaeta (Italy).
- 2016-2017: Member of the Scientific Committee of the FVCA8 conference (“Finite Volumes for Complex Applications 8”, Lille (France), 12–16 June 2017).
- 2016 (3/10–7/10): co-organisation of the international conference on “Advanced numerical methods: recent developments, analysis, and applications” (one of the main events of the thematic quarter “Numerical PDEs at the IHP”, Paris).
- 2016 (27/11–30/11): co-chair of the “Computational Techniques and Applications Conference 2016” (CTAC16; Monash University, Melbourne).
- 2016 (15/02–19/02): co-organisation of the “Monash Workshop on Numerical PDEs” (Monash University, Melbourne).
- 2013-2014: Member of the Scientific Committee of the FVCA7 conference (“Finite Volumes for Complex Applications 7”, Berlin, 16-20 June 2014).

Administrative roles

- ◇ 01/2019-...: head of the Applied Mathematics section in the School of Mathematics at Monash.
- ◇ 01/08/2018-...: member of the Monash Academic Board.

⁴Recently created open-access journal by a non-profit publisher, supported by the French Mathematical Society (SMF).

- ◇ 2016-...: co-founder and co-chair (until December 2018) of the Mathematics of Computation and Optimisation special interest group of the AustMS (Australian Mathematical Society). Regular member of the executive board since January 2019.
- 2014-2016: Chair of the Computational Mathematics Group, special interest group of the ANZIAM (Australian and New-Zealand Industrial and Applied Mathematics, division of the Australian Mathematical Society).
- 2013-2016: Honours coordinator for the School of Mathematical Sciences at Monash University.
- 2013-2016: Member of the AustMS Student Support Scheme Committee (chair in 2015).
- 2010-2011: Associate Dean of the Faculty of Sciences at the University Montpellier 2.
- 2009-2010: Deputy Head of the “pôle MIPS”⁵ (and elected member of its board from 2008 to 2011.)
- 2007-2010: Vice-President (publications) of the French Society for Applied and Industrial Mathematics (SMAI).
- 2008-2009: Head of the team ACSIOM (Analysis, scientific computing and optimization) of the Institute of Mathematics and Modelling of Montpellier (I3M) at the University Montpellier 2 (and member of the executive board of I3M from 2003 to 2009).
- 2003-2011: member of the executive board of the Teaching Department of Mathematics at the University Montpellier 2.
- 2003-2009: member of the executive board of the Institut de Mathématiques et de Modélisation de Montpellier (I3M, UMR CNRS 5149) of Mathematics at the University Montpellier 2.

⁵MIPS is like a School of Sciences gathering Mathematics, Computer Sciences, Physics, Electronics, Robotics and Mechanics. It has in charge the reflection and management of research and teaching in these sciences within the University Montpellier 2.
