Lecturing in Large Classes

Reflections

When to use:

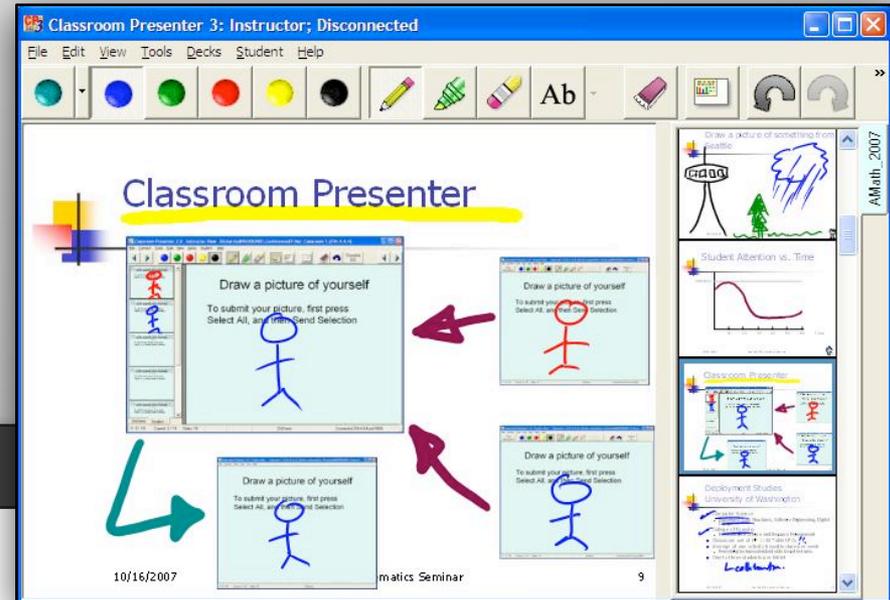

- Always ... (?)

Why it is so good:

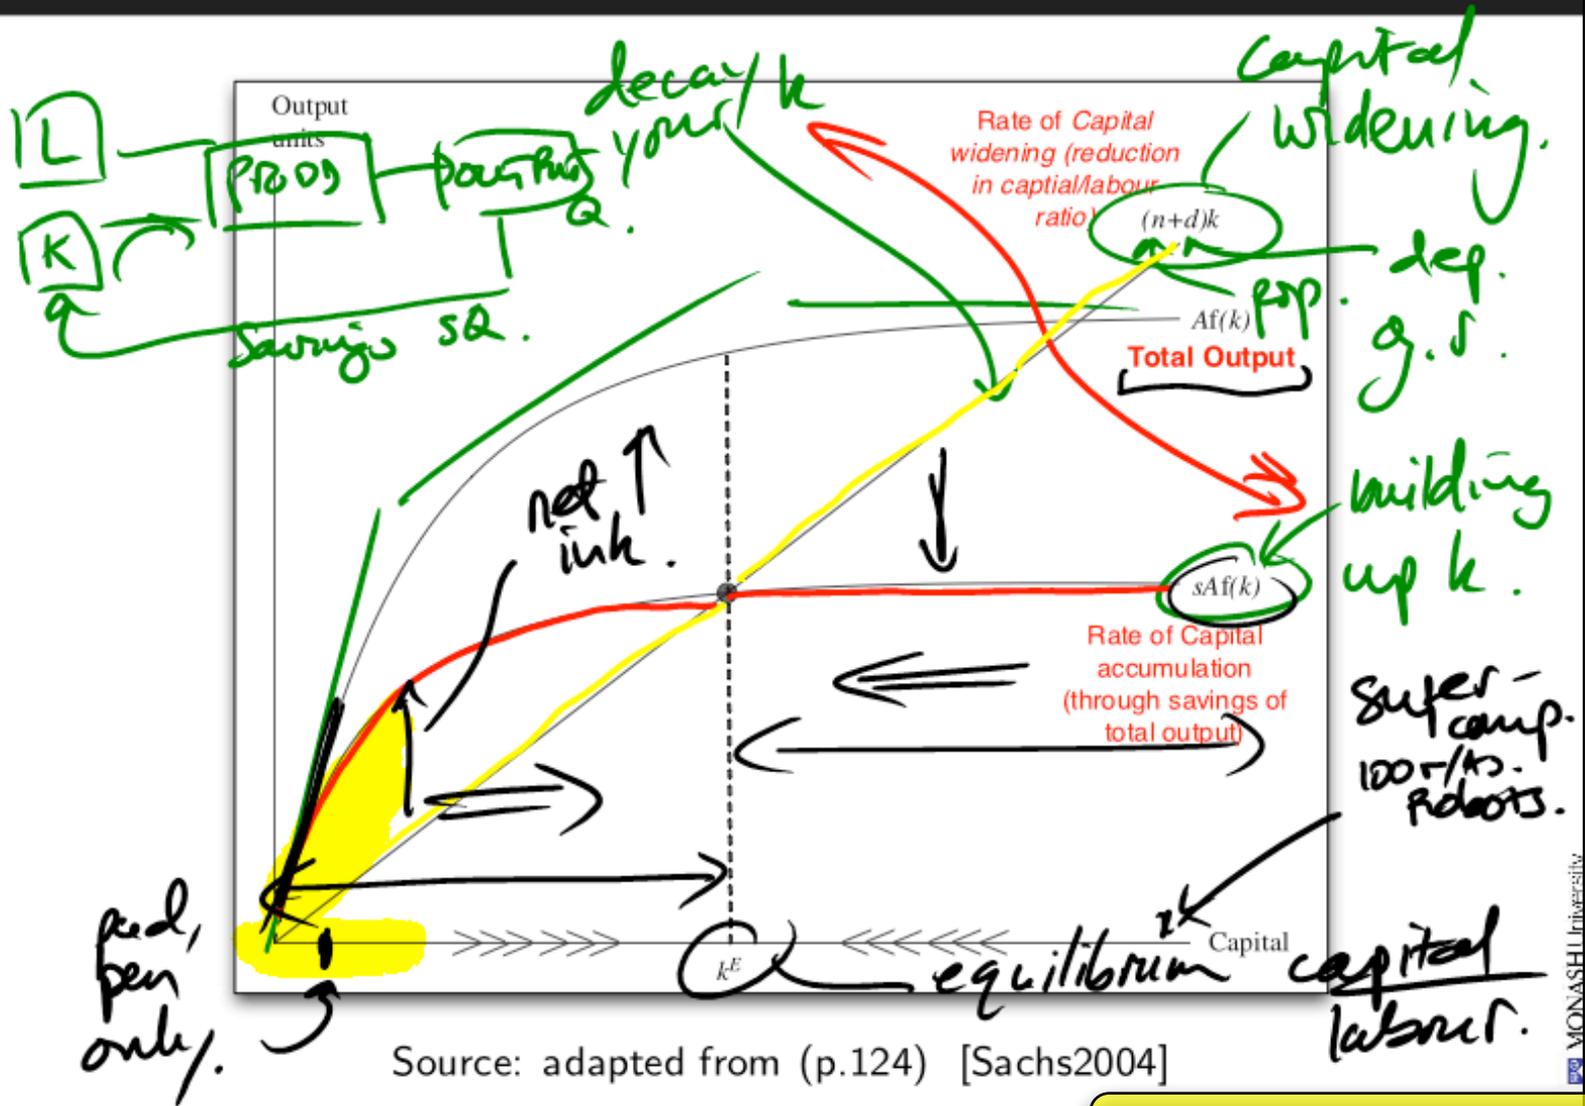

- DYNAMIC!!!
- Can have pre-prepared materials, but then dynamically edit them, scribble on them, create new materials -- all are saved
- Easy to use, easy to put on the web
- Students love it (so far) (survey results to come)

On the other hand:

- ? (a little more admin?)

health

Importance of using \gg yrs of data to capture period where most change occurred in health var.

AVORA'S STUDY — HOW DOES GROWTH RATE IN GDP/CAP RESPOND TO SHOCK IN HEALTH VARIABLE (e.g. LIFE EXPECTANCY).

In ECG2800 PPS ...

$$x_i: \mathcal{L} = x_i^{\alpha_i} \times \prod_{j \neq i} x_j^{\alpha_j} + \lambda (y - (p_i x_i + \sum_{j \neq i} p_j x_j))$$

- Then using the first-order conditions (~~λ~~ = Lagrange multiplier):

$$\alpha_i x_i^{\alpha_i - 1} \prod_{j \neq i} x_j^{\alpha_j} - \lambda p_i = 0, \quad i = 1, \dots, m.$$

- Multiplying x_i leads to

$$x_i^1 \times x_i^{\alpha_i - 1} \times x_i^{\alpha_i} \star \alpha_i \left(\prod_{j=1}^m x_j^{\alpha_j} \right) - \lambda p_i x_i = 0, \quad i = 1, \dots, m.$$

$-\lambda p_1 x_1 - \lambda p_2 x_2 - \lambda p_3 x_3 \dots$
 $-\lambda (p_1 x_1 + p_2 x_2 + \dots + p_m x_m)$
 $= -\lambda p \cdot x$
 $a_1 k + a_2 k + a_3 k \dots k(\sum a_i)$

- Summing these equations over i and letting $\alpha = \sum \alpha_i \ll$, we get

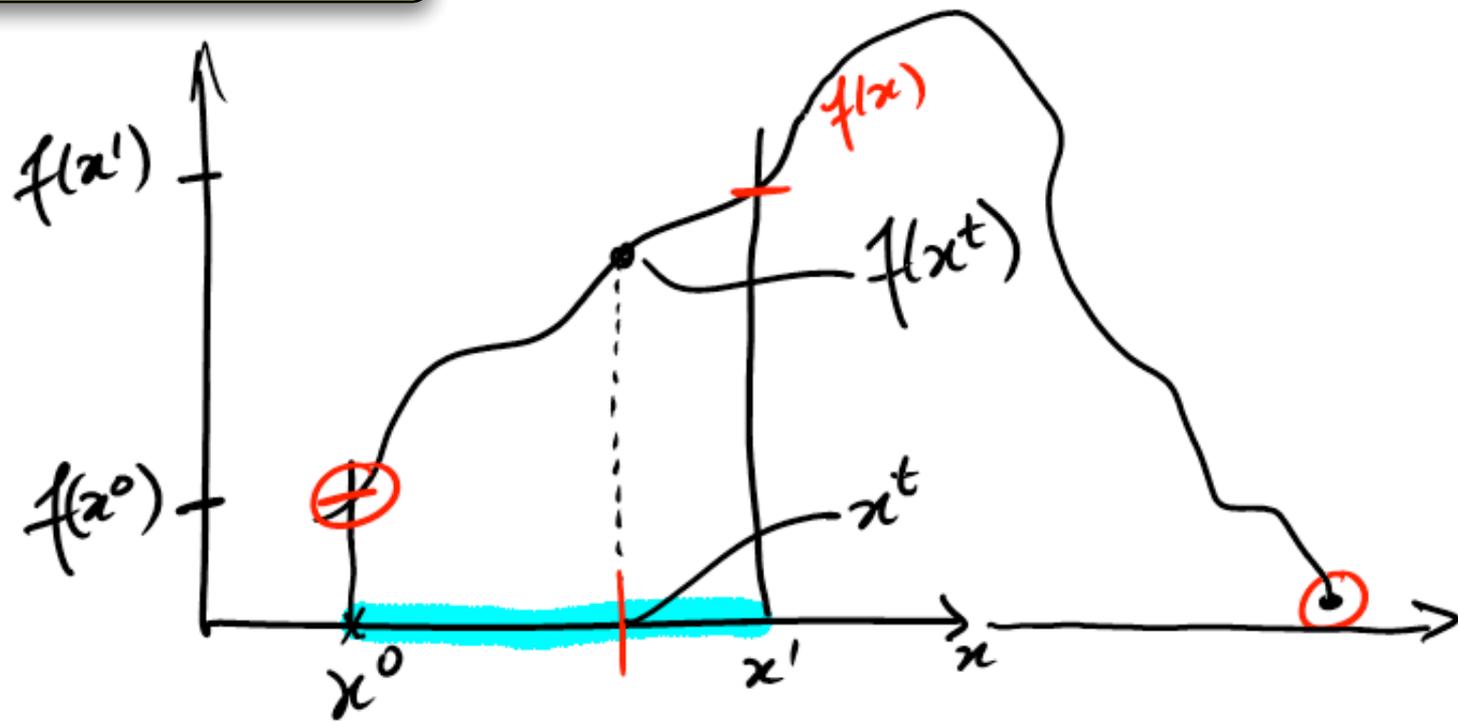

$$\left\{ \alpha \prod_{j=1}^m x_j^{\alpha_j} - \lambda p x = 0 \right\} \Rightarrow \lambda = \frac{\alpha}{y} \prod_{j=1}^m x_j^{\alpha_j}$$

②

- which leads to

$$x_i = \frac{\alpha_i}{\alpha} \frac{y}{p_i}$$

Alesina: summing up

From the point of view of efficient aid, each of the “big three” donors – U.S., Japan, and France – has a different distortion:

- 1 The U.S. has targeted about one-third of its total assistance to **Egypt and Israel**;
- 2 France has given overwhelmingly to its **former colonies**; and
- 3 Japan's aid is highly correlated with **UN voting patterns** (countries that vote in tandem with Japan receive more assistance).

These countries aid allocations may be very effective at promoting strategic interests, but the result is that bilateral aid has only a weak association with poverty, democracy, and good policy. (p.55) [AlesinaJEG2000]

Layout for the quote appropriate for handout

Alesina: summing up

From the point of view of efficient aid, each of the "big three" donors – U.S., Japan, and France – has a different distortion:

1. The U.S. has targeted about one-third of its total assistance to *Egypt and Israel*;
2. France has given overwhelmingly to its *former colonies*; and
3. Japans aid is highly correlated with *UN voting patterns* (countries that vote in tandem with Japan receive more assistance).

These countries aid allocations may be very effective at promoting strategic interests, but the result is that bilateral aid has only a weak association with poverty, democracy, and good policy.(p.55)

[[Alesina and Dollar, 2000](#)]

3 Aid Accountability

Monitoring Aid Agencies

Easterly & Pfutze (JEP, 2008)

Approach:

Selectivity: fraction of aid going to 'worthy' recipients (low corruption, very poor etc.)

Ineffective channels: is aid tied to goods from the donor, or food brought in unnecessarily, etc.?

Fragmentation: number of countries/organisations that work in a given recipient country, or program

Overheads: overheads in aid provision

Transparency: willingness/ability to report on administrative details (number of employees, admin costs, consultants, total aid spend etc.)

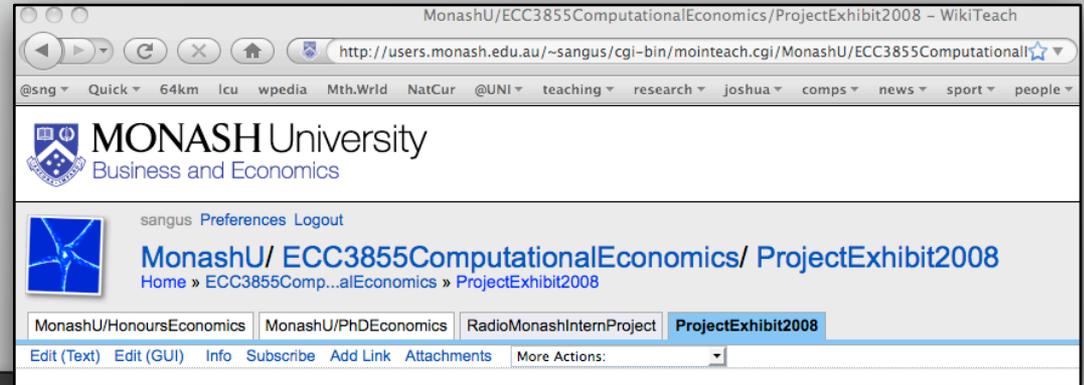

Sectioning (contents table), clear layout

Referencing: hyperlinked, bibliography, clear

In handout mode ...

Wikis

Lecturing in Large Classes

Reflections

When to use:

- Short lead-time, lots of hyper-links, web-content, (e.g. you're only teaching it once)

Why it is so good:

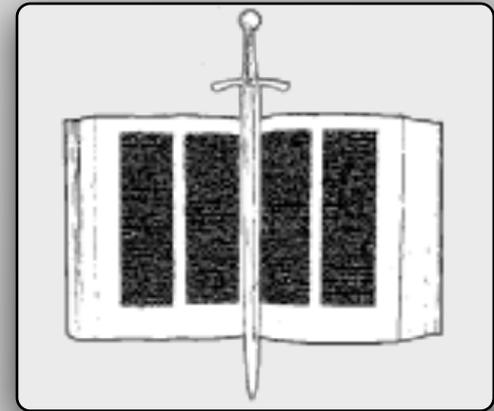

- Super fast ('wiki-wiki!'), hyper-links to pics very easy
- Dynamic updating (in-class updating?!)

On the other hand:

- Pretty bad handouts (not specific format), not that nice to look at
- Most students don't have laptops, so `all-in' edit not there yet ...

Damocles

Assessment in Large Classes

Reflections

When to use:

- Whenever you have in-session referenced essay work

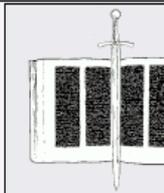

Why it is so good:

- Takes out all the leg-work! (references, highlighting etc.)
- Very, very good at what it does
- All online -- mark the essays anywhere (no paper submission)

On the other hand:

- ... student education re: plagiarism!

2 Research Essay

3

4 [12 words] 2. "In China the struggle to consolidate the socialist system, the struggle

5 [32 words] to decide whether socialism or capitalism will prevail, will still take a long historical period. However, we should all realize that the new system of socialism will unquestionably be consolidated. We can [27 words] assuredly build a socialist state with modern industry, modern agriculture, and modern science and culture." [11 words] (Mao Tse Tung, [11 words] Speech at the Chinese Communist Party's National Conference on Propaganda Work, 1957) Is this statement true? Investigate the recent history of China with reference to the effects of economic institutional reform and globalisation on China's economy to support your answer.

6 Abstract:

7 This paper is focusing on investigating whether now China is now under socialism or capitalism, and whether it will build a new system of socialism under the [9 words] modern industry, modern agriculture, and modern science and culture by analyzing the effects of economic institutional reforms and globalization.

8 Introduction:

9 In order to demonstrate whether this statement is true or not, it is

10 important to firstly look at the [15 words] definitions of socialism, capitalism and how valid they are under Chinese situations. And then it is important to discuss whether China will take a long period to decide and consolidate the socialist system. Finally, discuss about whether [16 words] the new system of socialism will be realized and built [10 words] with modern industry, modern agriculture, and modern science and culture.

11 From 1980 till 1991, Deng Xiao Ping, who [11 words] as the late leader of the Communist Party of China (CPC), [13 words] developed Socialism with Chinese characteristics and Chinese economic reform, also known as the market socialism, [17 words] and opened China to the global market, has asked the question of "what is socialism" for at least 20 times. He systematically expatiated on why we need to raise this question. [88 words] "The realization of socialism and communism was the lofty ideal we Marxists set for ourselves during the revolutionary years. Now that we are trying to reform the economy, we shall continue to keep to the socialist road and to uphold the ideal of communism. This is something our younger generation in particular must understand. But the problem is: what is socialism and how is it to be built? The most important lesson we have learned, among a great many others, is that we must be clear about those [35 words] questions."

12 (Deng, 1985)

13 As we all know that it is very hard to define the socialism and capitalism in just simple terms, as they are very complex

Individual Essay

17 Will ^[17 words] the struggle to consolidate the socialist system, the struggle to decide whether socialism or capitalism will prevail, ^[15 words] take a long historical period in China?

18 This is certain that China ^[6 words] will take a long historical period ^[5 words] to consolidate the socialist system and ^[17 words] decide whether socialism or capitalism will prevail. It can be proven from the following aspects.

19 First of all, Chinese economic institutional reform does not have a frame of reference. And that's one of the reasons that China did struggle a lot to find itself a suitable and proper economic system. There is no precedent ahead for China's leaders to be served as Chinese economy systems. All could be done is just to explore and experiment the ways themselves, or take what has been proven success. From 1958, Mao Zedong, ^[14 words] the leader of the People's Republic of China (PRC) from its establishment in 1949 decided to ^[6 words] delegate decision making power and relinquish from ^[5 words] central to the local authorities. This ^[7 words] reform, similar to Nikita Khrushchev's sovnarkhoz reforms

20 ^[21 words] in the Soviet Union in 1957, was emphasized on transferring from the central to local governments of the planning power, the ^[6 words] power of material resource allocation, the ^[6 words] control over enterprises, the power of ^[12 words] reviewing and approving capital construction projects and the administration of credit, the ^[5 words] administration of finance and tax-collection, the labor management, However, Mao did not realize that the highly controlled decision making power is the essence of central-planned economy. Simply decentralizing planned system without ^[9 words] a planned economy and administrative resource allocation led to several serious problems such as macroeconomic instability, rising inequality, ^[7 words] widening shortages in supplies of daily necessities, and huge chaos in the Chinese economy in 1958. This then led to regaining the central power, ^[8 words] which in turn caused another round of reform. ^[16 words] In 1978 Chinese leaders realized the weakness of Soviet-style planning and the need for reform but still ^[5 words] did not have a blueprint. ^[6 words] As early as in 1986, Chinese government, the State Council, ^[7 words] conceived a coordinated reform that focused on taxation, price, and fiscal policy systems. ^[6 words] Economic System Reform Program Design Office drew up plans for proposed ^[5 words] reforms with a focus on taxation, price, banking, finance, ^[12 words] and foreign trade in the early stages of the Seventh Five-Year Plan. ^[14 words] However, the leader of the State Council changed his mind in October that year.

21 Instead of implementing the coordinated reforms in taxation, price,

22 government banking, finance, ^[13 words] and foreign trade, he changed direction and focused on the reform of SOEs, which ^[5 words] took reform back to the traditional way ^[11 words] of maintaining both a market economy and a planned economy simultaneously.

23 Secondly, Chinese economic institutional reforms are not based on the mature and stable reform theories. The key idea of Marxism and Leninist is that: "if there is no theory of revolution, then there is no practice of revolution". However, Chinese economic reforms are not based on this kind of mature and stable reform theories. ^[7 words] "Cross the river by feeling the stones underneath the water with our feet" is the main idea of Chinese economic reforms. Nevertheless, the leaders of China still need to give the directions of where the economic institutional reforms are going to ahead and give the logical and reasonable explanations. That's why they have the National People's Congress held every several years as the main feature of China. In the

Assessment in Large Classes

Reflections

When to use:

- When you have readings as part of your unit
- Instead of tutorial/small-group discussions

Why it is so good:

- Students READ THE READINGS!
- Small-groups (2-5 ppl is best), high social cost of not contributing
- Mark individually, however (and stress positive externalities)
- Can get in and engage with them, give prizes etc. (Post of the week)

On the other hand:

- Admin to set them up at the beginning
- Can become time-consuming: needs wise management

Administration in Large Classes

Reflections

When to use:

- Low-cost, **personalised** feedback

Why it is so good:

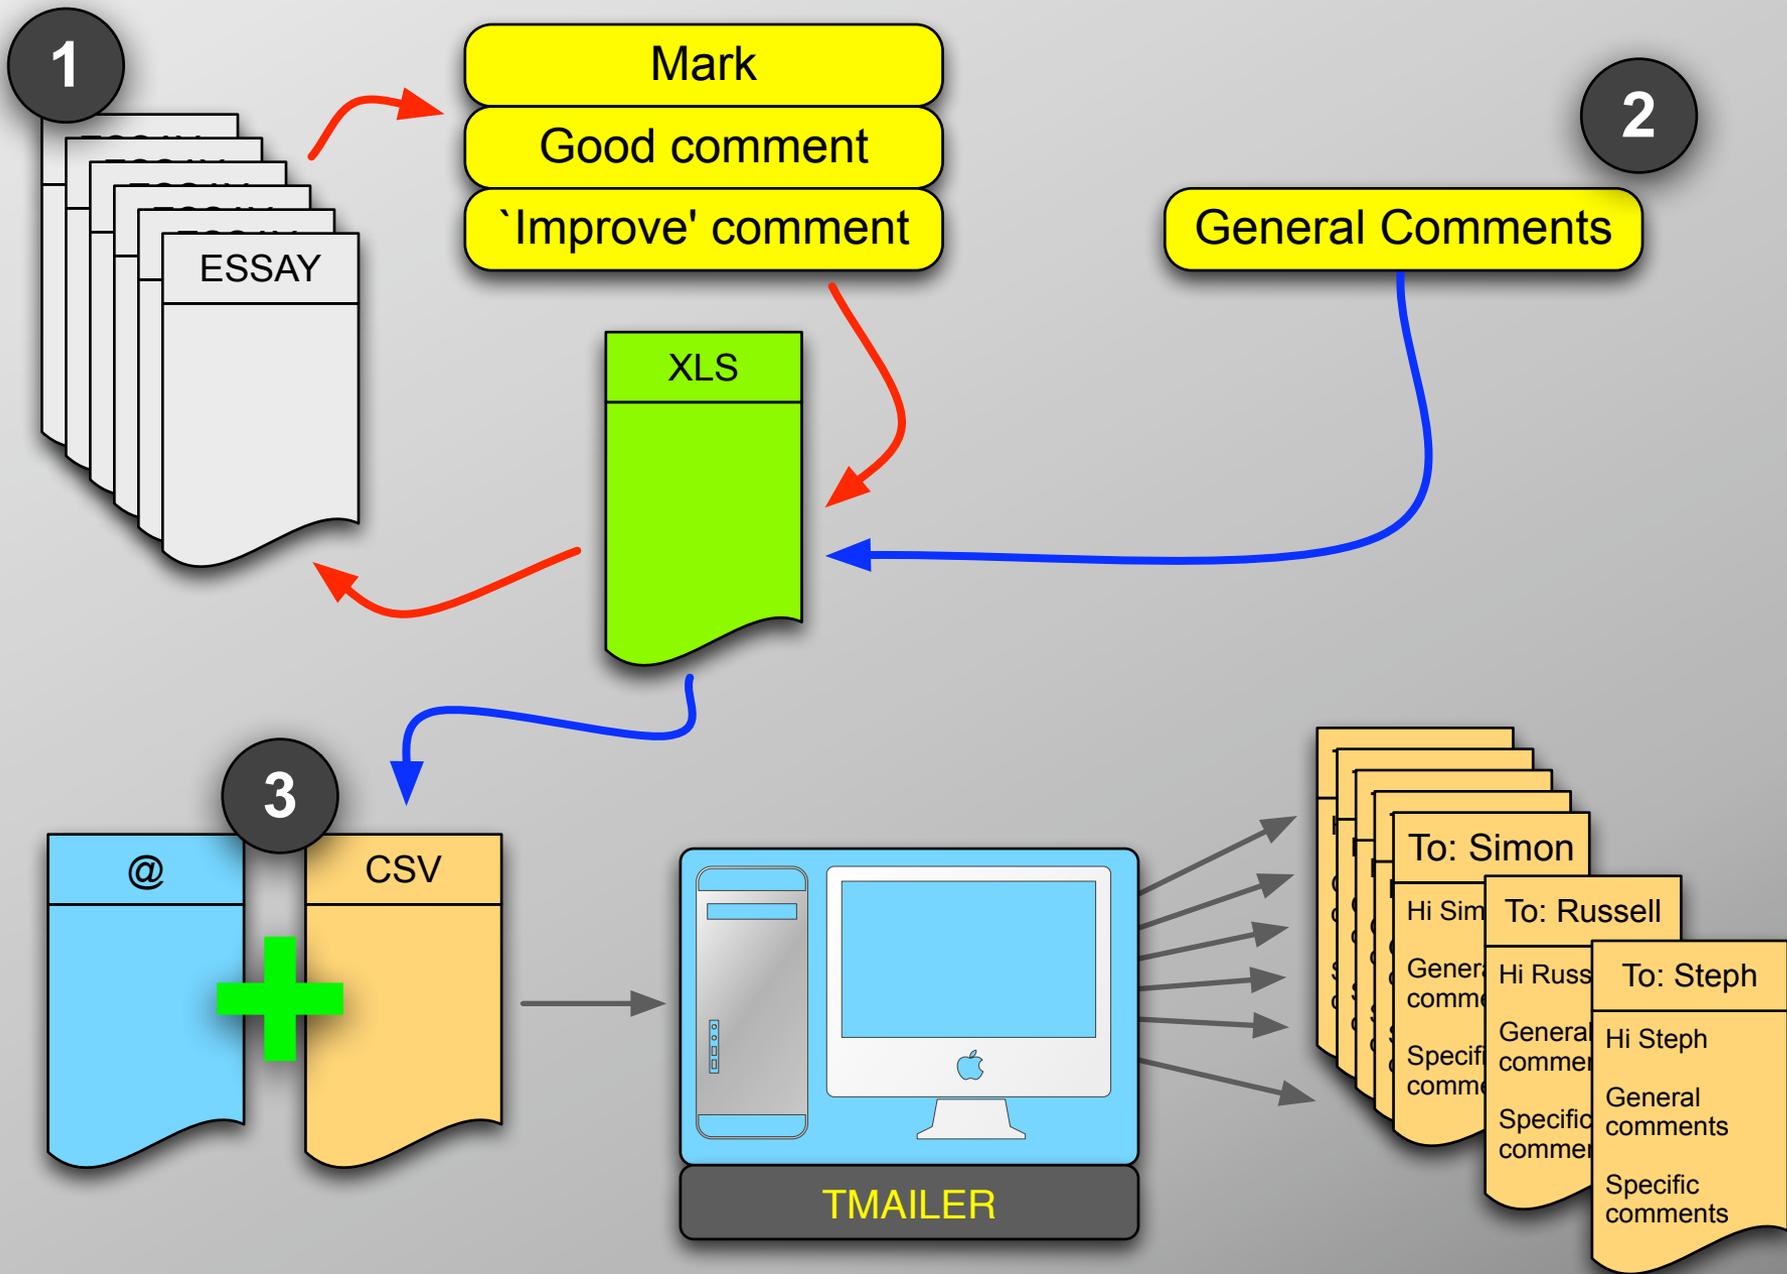

- Students really love it (see quotes)

On the other hand:

- Everyone gets a 'do more of' and a 'do less of' comment .. novelty?!
- Setup? (easy when you've done it once)

Thank you for in-depth response to our essays. I must admit that I was surprised to have such good feedback as I have rarely had lecturers provide feedback at the level you have, from either Monash or Melbourne.

Thank you so much for this feedback. I can honestly say it is the most in-depth analysis I have ever received for an assignment and will likely help me greatly improve on my form and structure for future assignments. The flaws you pointed out about my report are things that I have noticed as well, but now that you have brought them to my attention I have more of an incentive to work on them in order to improve the general quality of my work.
