

## Sean Farrell

PhD Student

School of Physical, Environmental and Mathematical  
Sciences

UNSW@ADFA  
Canberra, Australia

1. I am currently in the third year of my PhD and am aiming to submit my thesis in December this year.
2. My research area is X-ray binaries, particularly looking at the multiwavelength variability of the High Mass X-ray binary and X-ray pulsar 2S 0114+650.
3. In January 2007 I will be moving to Toulouse, France, to begin a postdoc with the Centre d'Etude Spatiale des Rayonnements (CESR) with Didier Barret and Natalie Webb, where ~50% of my time will be spent working with the *XMM-Newton* Survey Science Centre.
